DARE TO GO WHERE OTHERS CAN'T

Kramer's new line of HDMI HDBaseT range extenders, available as standalone and wall plate versions, sends an HDMI signal up to 130m when using Kramer's BC–DGKat623 cable, compared to 100m when using a standard industry cable.

For demanding applications, Kramer is offering a special XTRA (Long Reach) Mode*, allowing 1080p 60Hz HDMI signals with 8 bit color, to reach all the way to 180m when using Kramer's DGKat623 cable.

Kramer's 4K-Ready, certified, HDBaseT range extenders provide a simple, direct connection with any other certified HDBaseT products from leading vendors in the industry.

*XTRA (Long Reach) Mode is supported on the TP-580TXR/RXR and WP-580TXR/RXR modules.
