KRAMER
Control Solutions

Control Made Simple.

K-TOUCH

Robust

Joe Gibbs Racing uses K-Touch to manage the routing of their video content during every Nascar Spring Cup Series race. The environment is very hostile to wireless networks and the pit crew is still able to easily select the content that they need with no delay or drop out.

Easy

Houses of Worship regularly have volunteer staff operate AV systems. K-Touch can provide a simple and intuitive interface that makes it easy for anyone to operate.

Sleek

High-end theaters demand an elegant look that accents the decor and style throughout the facility. K-Touch is able to be 100% customized to specific applications.

Capable

In a major US University, K-Touch was able to replace an existing high-end control system without sacrificing any functionality or ease of use. It was also able to save the university 40% on the overall cost of the project!
