

64 x 24 x 7

64 UP TO 64X64 IN ONE 4RU FRAME
24 OPERATES RELIABLY FOR TWENTY-FOUR HOURS A DAY
7 PROTECTED BY OUR 7 YEAR WARRANTY

- Optional redundant power supplies & control processors
- Sierra control hardware & software components, including HD-SDI/SDI multi-format flexibility
- Modular design: expandable by 8 input and/or 8 output increments
- Hot-swappable video I/O boards, CPU boards
- Allows use of LC-style fiber connectors or BNC connectors to route fiber feeds.
- Eliminates need for external conversion equipment.
- Bandwidth from 50Mbps to 3Gbps allowing cable distance of up to 10km @ 3Gbps.
- Converts a valid 270Mbps digital video input signal to output composite analog video.
- Each output automatically detects the incoming format and delivers the corresponding composite output in either NTSC or PAL.
- Ideal for monitoring digital signals or conversion to composite for duplication or distribution.
