

SIMPLIFY YOUR MESSAGE

Their simplicity is inspiring and image quality is unparalleled. No matter how many video sources go into a Kramer VP-728 or VP-729 ProScale™ Digital Scaler/Switcher, they simplify your system connectivity over one cable, while the incorporated HQV™ (Hollywood Quality Video) processing provides the best possible picture quality. Glitch-free switching between sources eliminates distractions, while the 7-year warranty leaves you worry-free. Make a Kramer VP-728 or VP-729 a major component of your presentation and start connecting with your audience.
