

Step in to the Future

The Digital Step-in boardroom solution was awarded Most InAVative Commercial Video Distribution Product at the 2013 InAVation Awards, and Systems Product of the Year at the 2012 AV Awards

The Digital Step-in system is designed to bring flexibility and versatility to your boardroom or presentation suite. Kramer's Digital Step-in system allows you to easily connect to the display device from any source with any major video interface.

The system comprises a switcher and up to eight Step-in modules, each one connected by a twisted pair cable, with two additional local inputs (DVI, HDMI). It allows each user to connect their video source and take control of the main display by pressing the Step-in button on their individual Step-in module. Modules are offered in HDMI, DVI, DisplayPort and 15-pin HD computer graphics video, all with separate audio input. An additional multi-format module, SID-X1, conveniently combines all the video interfaces, making your system extremely adaptable.
