

# FAR, FARTHER, FARTHEST

A big challenge in AV system design today is sending high resolution signals over farther and farther distances. Whether in a classroom, a large auditorium or from one end of a large building complex to the other, there needs to be "Far, Farther and Farthest" solutions. Kramer Electronics offers standard twisted pair (Far), our advanced Cobra™ line of twisted pair (Farther) and fiber optic product solutions (Farthest) to meet any or all of these demanding AV signal distribution needs. It's "Time to Switch" to Kramer Electronics.

No matter what the distance challenge is, with Kramer you can go that distance.
