Step 3: Mount DIP-31

Install DIP-31 using one of the following methods:

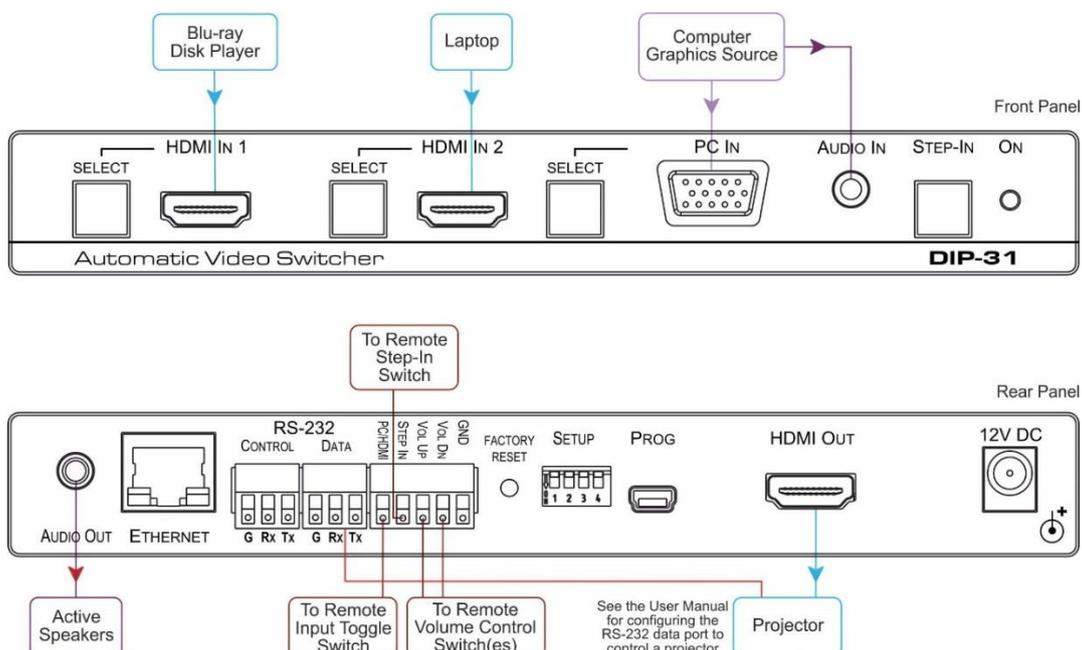

- Attach the rubber feet and place the unit on a flat surface.
- Fasten a bracket (included) on each side of the unit and attach it to a flat surface (see www.kramerav.com/downloads/DIP-31).
- Mount the unit in a rack using the recommended rack adapter (see www.kramerav.com/product/DIP-31).

- Ensure that the environment (e.g., maximum ambient temperature & air flow) is compatible for the device.
- Avoid uneven mechanical loading.
- Appropriate consideration of equipment nameplate ratings should be used for avoiding overloading of the circuits.
- Reliable earthing of rack-mounted equipment should be maintained.
- Maximum mounting height for the device is 2 meters.

Step 4: Connect inputs and outputs

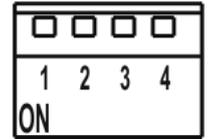

Always switch OFF the power on each device before connecting it to your DIP-31. For best results, we recommend that you always use Kramer high-performance cables to connect AV equipment to the DIP-31.
