

## Technical Note

**Product Name:** T-1GD  
**Technical Note Date:** March 4, 2020

### T-1GD product notice – US-D size plastic control panels incompatibility

Kramer is upgrading the look of its US-D size panels for the following products: RC-206, RC-306, RC-208 and RC-308. The upgraded panels are plastic and a bit larger than the current metal panels. This causes difficulties in installing the US-D size products in a TBUS using the current T-1GD bracket.

The following product revisions include the metal panel and can fit in the current T-1GD:

- RC-206, Rev- 0000
- RC-306, Rev- 0101 and 0102
- RC-208, Rev- 0000
- RC-308, Rev- 0001

The modified T-1GD bracket is in production now and will fit both US-D size panel versions, plastic and metal.

For updates, check the T-1GD product page on the Kramer AV website:
