

The Kramer T3F-1C Inner Frame

Congratulations on purchasing your Kramer **T3F-1C** inner frame for the **TBUS-3xI** Table Connection bus.

The **T3F-1C** inner frame includes:

- An opening for 1 power socket
- A 4-cable pass-through insert

Figure 1: T3F-1C Inner Frame (P/N: 80-003199)

Power Socket and Power Cord Options

Various power sockets and power cords are available to use with the **T3F-1C**, as described in the "TBUS Modular Power Socket Installation and Power Cord" Installation Instructions, supplied with the power socket.

Each power socket comes with detailed assembly instructions.

The T-2INSERT Kit Option (80-00006699)

You can install the **T-2INSERT** kit (which includes 1 pass-through insert and a blank insert) instead of a power socket.

Go to http://www.kramerelectronics.com/support/product_downloads.asp to check for up-to-date user manuals and the complete list of Kramer wall plates and module connectors.

Installing the assembled Inner Frame

To install the **T3F-1C** inner frame:

1. Place the assembled inner frame inside the **TBUS-3xI** enclosure.
2. Set the required height using your fingers to bring the inner frame to the desired position, screw and tighten it in place using the height adjustment screws supplied with the inner frame.

Inserting Pass-through Cables

To insert the pass-through cables (for example, to connect a laptop) do the following:

1. Remove the four screws attaching the split pass-through bracket.
2. Remove the split grommet(s).
3. Insert the cable(s) through the rectangular opening.
4. Open the split grommet slightly and insert the required cables.
5. Place the split bracket around the grommet and position this assembly over the inner frame.
6. Place the four screws appropriately and tighten the split bracket together with the grommet and inserted cables to the inner frame.
7. Insert the self-locking ties through the tie holes to secure the cables to the inside walls of the enclosure.

Adjusting the Height of the Inner Frame

If needed, you can adjust the inner frame height to accommodate large or bulky cables. To adjust, perform the following:

1. Remove the height adjustment screws, while supporting the frame from underneath with your fingers.
2. Raise or lower the connecting surface to the required height, insert the screws, and tighten them in place.
