The Kramer T6F-03M Inner Frame

Congratulations on purchasing your Kramer T6F-03M Inner Frame for the TBUS-6XL Table Connection bus.

The T6F-03M Inner Frame includes:

- An opening for 1 MegaTOOL
- 2 spacers for installing the MegaTOOL
- 3 blank inserts

Installing the Wall Plate Inserts

Before installing the inner frame, you need to install wall plate inserts.

![Figure 2: Installing the MegaTOOL](image)

Installing a MegaTOOL

To install a MegaTOOL, as shown in Figure 2:

1. Insert the MegaTOOL, from underneath, through the MegaTOOL opening.
2. Position the supplied spacers at their designated locations (one on each side).
3. Fasten the screws (one on each side) through the frame holes and spacers.

Installing the Inner Frame

To install the T6F-03M inner frame:

1. Place the assembled inner frame inside the TBUS-6XL enclosure.
2. Set the required height using your fingers to bring the inner frame to the desired position, screw and tighten it in place using the height adjustment screws supplied with the inner frame.
Connecting the Cables

When replacing blank inserts with connector inserts (for example, VGA, audio, HDMI and so on):

1. Insert the cables to their appropriate connectors from underneath.
2. Secure the cables to the tie holes on the TBUS-6XL.
   Do not secure the cables too tightly or too loosely. Leave a small amount of slack.

After the TBUS-6XL is connected to mains power and the proper cables, it is ready for use.

Adjusting the Height of the Inner Frame

If needed, you can adjust the inner frame to one of the possible heights to accommodate large or bulky cables. To adjust, perform the following:

1. Remove the height adjustment screws, while supporting the frame from underneath with your fingers.
2. Raise or lower the connecting surface to the required height, insert the screws, and tighten them in place.
