1 Introduction

Welcome to Kramer Electronics (since 1981): a world of unique, creative and affordable solutions to the infinite range of problems that confront the video, audio and presentation professional on a daily basis. In recent years, we have redesigned and upgraded most of our line, making the best even better! Our 500-plus different models now appear in 8 Groups\(^1\), which are clearly defined by function.

Congratulations on purchasing your VA-256xl Audio Delay, which is ideal for professional audio/video broadcasting and production studios.

The package includes the following items:
- **VA-256xl Audio Delay**
- Power adapter (12V DC Input)
- This user manual\(^2\)

2 Getting Started

We recommend that you:
- Unpack the equipment carefully and save the original box and packaging materials for possible future shipment
- Review the contents of this user manual
- Use Kramer high performance high resolution cables\(^3\)

2.1 Quick Start

This Quick start chart summarizes the basic steps when connecting the VA-256xl:

\(^1\) GROUP 1: Distribution Amplifiers; GROUP 2: Video and Audio Switchers, Matrix Switchers and Controllers; GROUP 3: Video, Audio, VGA/XGA Processors; GROUP 4: Interfaces and Sync Processors; GROUP 5: Twisted Pair Interfaces; GROUP 6: Accessories and Rack Adapters; GROUP 7: Scan Converters and Scalers; and GROUP 8: Cables and Connectors

\(^2\) Download up-to-date Kramer user manuals from the Internet at this URL: http://www.kramerelectronics.com

\(^3\) The complete list of Kramer cables is on our Web site at http://www.kramerelectronics.com
**Step 1: Connect the Input and the output**

Connect the VA-256x1 between the audio source and the audio acceptor via the 1 ANALOG INPUT and the 2 ANALOG OUTPUT terminal block connectors, respectively.

**Step 2: Turn the power ON**

**Step 3: Set the unit**

**SET THE DELAY TIME**

Use the DELAY CONTROL + and - buttons to set the delay time in msec

**SET THE BRIGHTNESS OF THE DISPLAY**

- Press both the + and - buttons continuously for 3 seconds. The buttons illuminate and the display presents the brightness level.
- Press + or - to increase or decrease the brightness level respectively.
The Kramer **VA-256xl** is a balanced stereo analog audio delay that:

- Lets you adjust for lip sync errors so that the audio delay will match the video delay\(^1\)
- Provides a delay time, ranging from 1msec up to 5.4 seconds in increments of 1msec
- Lets you adjust the display brightness
- Recalls the previously set input delay settings and the display brightness level via its non-volatile memory after powering up
- Is 12VDC fed and is housed in a TOOLS enclosure

To achieve the best performance:

- Connect only good quality connection cables, thus avoiding interference, deterioration in signal quality due to poor matching, and elevated noise-levels (often associated with low quality cables)
- Avoid interference from neighboring electrical appliances and position your Kramer **VA-256xl** away from moisture, excessive sunlight and dust

---

1 An example of a TV broadcasting lip sync error is when the sound is heard before the speaker’s lips move
2 For example: model number AD2512C, part number 2535-000251

---

| Caution | – No operator-serviceable parts inside unit. |
| Warning | – Use only the Kramer Electronics input power wall adapter that is provided with this unit\(^2\). |
| Warning | – Disconnect power and unplug unit from wall before installing or removing device or servicing unit. |
4 Your VA-256xl Audio Delay

Figure 1 and Table 1 define the **VA-256xl Audio Delay**:

¹ For step-by-step response, press and release these button(s) as required. Press continuously for a quicker response.
² Also used to set the brightness of the display (see section 5.3)
³ Ranging from 1 to 5400msec in increments of 1msec (see section 5.2)
5 Using the VA-256xl Audio Delay

To adjust a lip sync error (when using a scaler, for example, the Kramer VP-724xl Seamless Switcher / Scaler), use the VA-256xl, as the example in Figure 2 illustrates:

1. Connect the VA-256xl, as follows (see section 5.1):
   - Connect the audio output of the “s-Video Source” to the YC1 AUDIO IN terminal block connector on the VP-724xl and then connect the AUDIO OUT terminal block connector of the VP-724xl to the ANALOG INPUT terminal block connector on the VA-256xl.
   - Connect the ANALOG OUTPUT terminal block connector on the VA-256xl to an audio acceptor (for example, a receiver).

2. Connect the 12V DC power adapter to the power socket and connect the adapter to the mains electricity.

3. Set the DELAY, as section 5.2 describes.

4. If required, set the display brightness (see section 5.3).

5.1 Connecting the Balanced/Unbalanced Stereo Audio Input/Output

Figure 3 illustrates how to wire a balanced input/output connection:

![Diagram of balanced stereo audio input/output]

*Figure 3: Connecting the Balanced Stereo Audio Input/Output*

Figure 4 illustrates how to wire an unbalanced input connection:

![Diagram of unbalanced stereo audio input]

*Figure 4: Connecting the Unbalanced Stereo Audio Input*

Figure 5 illustrates how to wire an unbalanced output:

![Diagram of unbalanced stereo audio output]

*Figure 5: Connecting the Unbalanced Stereo Audio Output*
5.2 Setting the Delay Time

Set the delay time via the – and + buttons\(^1\). The delay time is displayed (in msec) on the 7-segment display located next to these buttons.

The maximum delay time is 5.4 seconds.

The delay time setting is saved in the non-volatile memory.

5.3 Setting the Display Brightness (Dimmer Setting) Level

Use the dimmer settings to modify the brightness of the two input buttons and the display.

To set the brightness (dimmer setting) level, do the following:

1. Press both the + and – buttons continuously for 3 seconds.
   The two input buttons and the + and – buttons illuminate.
   The 7-segment display shows the brightness level\(^2\).

2. Press the + or – button to increase or decrease the brightness level.
   The brightness of the four buttons and the display is adjusted accordingly.

The dimmer settings mode time out after 20 seconds and the unit returns to normal operation.

The dimmer setting is saved in the non-volatile memory.

\(^1\) Specifications are subject to change without notice
LIMITED WARRANTY
Kramer Electronics (hereafter Kramer) warrants this product free from defects in material and workmanship under the following terms.

HOW LONG IS THE WARRANTY
Labor and parts are warranted for seven years from the date of the first customer purchase.

WHO IS PROTECTED?
Only the first purchase customer may enforce this warranty.

WHAT IS COVERED AND WHAT IS NOT COVERED
Except as below, this warranty covers all defects in material or workmanship in this product. The following are not covered by the warranty:
1. Any product which is not distributed by Kramer, or which is not purchased from an authorized Kramer dealer. If you are uncertain as to whether a dealer is authorized, please contact Kramer at one of the agents listed in the web site www.kramerelectronics.com.
2. Any product, on which the serial number has been defaced, modified or removed.
3. Damage, deterioration or malfunction resulting from:
   i) Accident, misuse, abuse, neglect, fire, water, lightning or other acts of nature
   ii) Product modification, or failure to follow instructions supplied with the product
   iii) Repair or attempted repair by anyone not authorized by Kramer
   iv) Any shipment of the product (claims must be presented to the carrier)
   v) Removal or installation of the product
   vi) Any other cause, which does not relate to a product defect
   vii) Cartons, equipment enclosures, cables or accessories used in conjunction with the product

WHAT WE WILL PAY FOR AND WHAT WE WILL NOT PAY FOR
We will pay labor and material expenses for covered items. We will not pay for the following:
4. Removal or installations charges.
5. Costs of initial technical adjustments (set-up), including adjustment of user controls or programming. These costs are the responsibility of the Kramer dealer from whom the product was purchased.
6. Shipping charges.

HOW YOU CAN GET WARRANTY SERVICE
7. To obtain service on your product, you must take or ship it prepaid to any authorized Kramer service center.
8. Whenever warranty service is required, the original dated invoice (or a copy) must be presented as proof of warranty coverage, and should be included in any shipment of the product. Please also include in any mailing a contact name, company, address, and a description of the problem(s).
9. For the name of the nearest Kramer authorized service center, consult your authorized dealer.

LIMITATION OF IMPLIED WARRANTIES
All implied warranties, including warranties of merchantability and fitness for a particular purpose, are limited in duration to the length of this warranty.

EXCLUSION OF DAMAGES
The liability of Kramer for any effective products is limited to the repair or replacement of the product at our option. Kramer shall not be liable for:
10. Damage to other property caused by defects in this product, damages based upon inconvenience, loss of use of the product, loss of time, commercial loss; or:
11. Any other damages, whether incidental, consequential or otherwise. Some countries may not allow limitations on how long an implied warranty lasts and/or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations and exclusions may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights, which vary from place to place.

NOTE: All products returned to Kramer for service must have prior approval. This may be obtained from your dealer.

This equipment has been tested to determine compliance with the requirements of:
EN-50081:  "Electromagnetic compatibility (EMC);
        generic emission standard.  Part 1: Residential, commercial and light industry"
EN-50082:  "Electromagnetic compatibility (EMC) generic immunity standard.  Part 1: Residential, commercial and light industry environment”
CFR-47: "FCC Rules and Regulations:
        Part 15: “Radio frequency devices
        Subpart B – Unintentional radiators”

CAUTION!
Servicing the machines can only be done by an authorized Kramer technician. Any user who makes changes or modifications to the unit without the expressed approval of the manufacturer will void user authority to operate the equipment.
Use the supplied DC power supply to feed power to the machine.
Please use recommended interconnection cables to connect the machine to other components.
For the latest information on our products and a list of Kramer distributors, visit our Web site: www.kramerelectronics.com, where updates to this user manual may be found.
We welcome your questions, comments and feedback.

Safety Warning:
Disconnect the unit from the power supply before opening/servicing.
