Product Name: K-Router Plus

Current Version: S – 2.0.30

Version Date: August 2014 (Rev 2)

Reference: 7255

Fixes:

- The machine configuration was correctly restored on the application GUI.

- Firmware update was not available for the VS-88HFS.

- K-Router Plus now reads the EDID file correctly from all devices, in both TCP and serial modes.

Known Issues:

- K-Router Plus only works with Protocol 3000. IR control does not work on the codependent products when the product is set to Protocol 3000 or controlled by K-Router Plus. To control the product using IR, the product must set to Protocol 2000 and use the previous version of K-Router.

- On the VS-1616D and the VS-3232D, K-Router Plus works via Ethernet only with new Fast Switching firmware. RS-232 works with any firmware Contact your local Kramer office for details.

Preceding Version: S – 2.0.28.0
