Bugs to Fix in Future Versions:

N/A

Known Limitations (including compatibility limitations):

| ID | Limitation Description |
|-------|---|
| 84671 | When an HDBT TV has a 4K30 EDID, matrix will not output 4K60 to outputs 1 and 2. For HDBT input 1 with 4K30 EDID, matrix will not recognize input 1 4K60 source. |
| 83965 | Improper web-UI display status for active output DVI display. |
| 82952 | Disconnecting an HDBT output causes a glitch on its mirrored HDMI output. |
| 84112 | Occasionally, FW upgrade with K-Upload may fail on 1st attempt. Workaround: Re-attempt to upgrade the FW. |
| 1874 | There may be an issue with the image freezing when connected to some older MAC computers. Select a 4K30 EDID for the input to which the MAC is connected to resolve the issue. |
| 1925 | Issues when recalling (via the RCL button) from an unsaved setup address. |

Preceding Version: N/A
