Codependency with Other Products and Software:

Product Name	Comments
VSM Software	If the VSM (VIA Site Manager)is running a version earlier than 4, it must be upgraded to Version 4 before the Gateways. See the VSM version 4 release notes for instructions.

Upgrade procedure for sites using a VSM running a version lower than 4:

1. Upgrade the VSM to version 3.3.1122 before upgrading the Gateways to 3.3.0722.
2. Upgrade the Gateways to 3.3.0722 before upgrading the VSM to version 4.
3. Upgrade the VSM to version 4 before upgrading the Gateways to version 4.0.1
4. Upgrade the Gateways to version 4.0.1.

New Features:

HTTPS MUST be used to connect to the Gateway URL: HTTP is no longer supported.
Use https//x.x.x.x.

New Feature Description
A completely updated, user-friendly client GUI The new dashboard is simple and intuitive to use with a faster start-up time. Changes include easy switching between LAN and Wi-Fi, automatic listing of meeting rooms, automatic connection to the last meeting room. Functions such as moderation, use of third-party apps and streaming are now clearly visible and easy to operate. For more information see "Presenting from the VIA User Dashboard" in the Gateway (Go^2, Connect^2 or Campus^2) User Manual.
Auto-disconnect The presenter is automatically disconnected when their device leaves the meeting room. See "Auto Disconnection" in the Gateway User Manual.
WI-FI advanced login Quick connect to the VIA Wi-Fi. Users can connect to meetings without using the organization network. See "Setting Up Secure Wireless Guest Access Point" in the Gateway User Manual.
Airplay Discovery via Bluetooth Airplay connecting handled automatically by the Gateway.

Release Notes

New Feature Description
Third party apps Third party apps can be run directly from the Gateway. See "Adding Third Party Apps" in the Gateway User Manual
Improved calendar display The wallpaper calendar widget can automatically list upcoming meetings on the Main Display. The calendar widget can be integrated with calendars from Office 365, Microsoft Exchange or Google. See "Formatting Calendar" in the Gateway User Manual.
Auto layout and resize windows on main display User presentation windows on the Main Display start with the height/width ratio of the originating device (mobile phone, laptop etc.). The windows can be manually adjusted to a preferred size.
Enhanced security - Wi-Fi connections can be isolated from the LAN, LAN users are isolated from each other, user auto-disconnect.

Dropped Features:

	Dropped Feature Description
Guest Mode	Replaced by "Activate Standalone Wi-Fi".
DnD / Do not Disturb	In the VIA 4.0.1 client app, this is now called "Present privately".

Discontinued Models (computing power insufficient for Version 4.0.1):

VIA Campus
VIA Campus Plus
VIA Connect Pro
VIA Connect Plus
VIA GO

(i) VSM supports discontinued models, but new features will not work on them.
