New Features:

	New Feature Description
	Added an the ability to require password authentication to access Kramer Aware app.

Bugs to Fix in Future Versions:

QC ID	Deferred Bug Description
10094	Configuration change cancel is unsupported. Workaround: Rechange to original configuration.
10552	Rarely, improper search results are presented.
10683,10687	Unnamed action / command / port cannot be deleted.
10685	Dragging and dropping an action to a script, incorrectly places it at the bottom of the list.
10714	Triggering an action with no command may reset the device. Workaround: Add a command to the action.
10715	After adding a new command to a list, the whole list may sometimes be given the status of new commands.
12918	Touch panel operation fails when web-UI access is user-authenticated.
13211	The touch panel “undo” function does not work properly.

Known Limitations (including compatibility limitations):

QC ID	Limitation Description
11747	Command protocol containing "\" (Backslash) is not supported. Workaround: Use "\x5C" instead of "\" hex value.
18000	The Bottom navigation bar setting must be disabled to use Kramer Aware on KT-107.
