

Product Name: SV-551

Current Version:	Ver.Type	Ver No.	Date
	Firmware	4.0.15.11355 Beta	January 2017
	Software	–	–
	Web	–	–
	Hardware	–	–

RN Date: January 2017

Reference: Beta

Kramer Product Affected:

Product Name	Minimum FW Version for Upgrade	Recommended for All Units	Only if Added Features are Required
SV-551	Any	Yes	N/A

Technical Notes:

- Makes SV-551 compatible with the latest version of Site-CTRL software.

Codependency with Other Products and Software:

Product Name	Comments
Site-CTRL	Control software

Current Firmware Version: 3.3.1.3782

Version Date: May 2011

Reference: 9999

The following changes were made in this version:

Fixes:

- The USB driver of the previous FW version caused connection problems with PCs running Windows Vista/32bit, Windows Vista/64bit, Windows 7/32bit and Windows 7/64bit.

Known Issues:

- A configuration must be loaded to the master before working with the auxiliary digital knob.

Preceding Firmware Version: 3.3.0.3494

KRAMER ELECTRONICS, Ltd.

E-mail: info@kramere.com

Web: www.kramerelectronics.com

Preceding Firmware Version: 3.3.0.3494

Version Date: March 2011

Reference: 6590

The following changes were made in this version:

Added Features:

- Support for K-Config version 1.0.1.X new features.
- Support for virtual K-NET™ device (APP based user interface device).
- Support for several K-NET™ auxiliary devices.
- Support for sending output control strings from relevant ports on auxiliary devices (serial, IR and relays).

Fixes:

- When secure mode was set to ON the following actions did not work: panel lock, power amplifier, LEDs light.
- Analog audio 10V volume control now works properly when the device is configured to work with analog volume control.

Known Issues:

- A configuration must be loaded to the master before working with the auxiliary digital knob.
- The current USB driver might cause connection problems with a PC running Windows Vista/32bit, Windows Vista/64bit, Windows 7/32bit, Windows 7/64bit. Use the Ethernet connection when connecting to a PC running these operating systems.

Preceding Firmware Version: 3.2.2.3124

KRAMER ELECTRONICS, Ltd.

E-mail: info@kramerel.com

Web: www.kramerelectronics.com

Preceding Firmware Version: 3.2.2.3124

Version Date: October 2010

Reference: 6301

The following changes were made in this version:

Added Features:

- Support for K-Config version 1.0.0.70 new features was added.

Fixes:

- Several minor bugs relating to overall performance were fixed.

Modifications:

- Memory handling was improved enabling smoother execution in large configurations.
- When using LookUp table, the answer is not converted to String.

Known Issues:

- When secure mode is set to ON the following actions do not work: panel lock, power amplifier, LEDs light.
- Analog audio control – in some rare cases, the SV-551 analog audio volume control (10V control input) might not work properly. Please prefer using the RC-6D series and RC-53D controllers for digital audio volume control.
