

Release Notes

Product Name: VSM Software

Current Version:

Type	Number	Date
Firmware	2.5.0519.240	May 2019
Software	–	–
Web	–	–
Hardware	–	–

RN Date: May 15, 2019

Reference: 15447

Kramer Product Affected:

Product Name	Minimum FW Version for Upgrade	Recommended for All Units	Only if Added Features are Required
VSM Software	Any	Yes	Yes

Technical Notes:

- Enhancements and improvements.
- New features are described in the updated User Manual.

After your VSM FW update is installed, your server must be rebooted.

Codependency with Other Products and Software:

Product Name	Comments
VSM	VSM version 2.3.0418.200 or higher is required before applying this update
All VIA Gateways	All VIA Gateways must run version 2.3.0418.960 or higher as a minimum requirement for using the VSM FW upgrade feature
All VIA Gateways	Once upgraded to this version, VSM fully supports and manages the settings of VIA gateways running the latest FW version: 2.5.0519.1032 . VIA devices running FW version 2.3 or 2.4 can only get FW update from the upgraded 2.5.0519.240 VSM but are not fully manageable.
All VIA Gateways	Use ONLY .zip files for updating your VIA devices.

Release Notes

	New Feature Description
	<p>New Third Party Calendar Support, in Calendar Management > Add Calendar Account:</p> <ul style="list-style-type: none"> • Microsoft Exchange server • Impersonate and Delegate calendar options
	<p>Fixed Text for Digital Signage, in Digital Signage > Manage Content > Create Scroller: Added option to create fixed text by setting scrolling speed to zero.</p>
	<p>Digital Signage > Manage Content > Create Scroller Ability to use predefined variables, such as:</p> <ul style="list-style-type: none"> • #airplayname# (name used for AirPlay) • #roomname# (name used for room) • #roomcode# (code generated for room connection) • #appass# (Access Point password) • #apname# (Access Point name) • #ipaddress1# (IP address of Primary network) • #ipaddress2# (IP address of Secondary network)

Modifications:

QC ID	Modification Description
	Simplified Groups and Permissions selection, under User Management > User List > Edit Permissions.
	User Management > User List > Edit Permission Removed the option to edit the permissions of the Administrator.
	Gateway Management > Add Group Change of UI from drop-down menu to radio buttons selection.
	Gateway Management > Manage Configurations > Advanced Removed the Push Configuration option.
	Firmware Management > Upload Firmware Added the note: "VIA firmware files are password protected ZIP files. It is NOT necessary to unzip the file first - please upload the encrypted file."

Bugs Fixed:

QC ID	Fixed Bug Description
	Gateway Management > Gateway List The gateway list is now populated in alphabetical order on home screen.

Release Notes

QC ID	Fixed Bug Description
	If a VIA device that is listed in the Gateway List under a specific IP address is disconnected and reconnected under a different IP address, the displayed IP address is now refreshed to the correct one.
	Default Password management / Session settings are now properly synchronized with new added gateway.
	When a gateway is configured with the old gateway ID, the NTP and SSL certificates are now synced to the gateway.
	Digital Signage > Manage Content Creating a scrolling text and changing the font size is now correctly reflected.
	Users can no longer view the reports of groups for which they have no access permission. Users can no longer add or manage gateways and configurations of groups for which they have no access permission.
	Miracast setting is no longer disabled on gateway while updating firmware from VSM.

Bugs to Fix in Future Versions:

QC ID	Deferred Bug Description
	If Global settings are set from VIA, the "Set from Gateway" icon should appear on the Gateway status page, instead of "VIA Pending Updates" icon.
	When a user schedules a Firmware update for Full day, the notification is missing on the Scheduler page that there is a Full day schedule set.

Known Limitations (including compatibility limitations):

QC ID	Limitation Description
	Digital Signage: When previewing scrolling text, using on Chrome browser, changing the scrolling speed does not affect the text, until it has scrolled past.

Firmware	2.4.0918.216	October 2018
Software	–	–
Web	–	–
Hardware	–	–

RN Date: October 2018

Reference: 14624

Kramer Product Affected:

Product Name	Minimum FW Version for Upgrade	Recommended for All Units	Only if Added Features are Required
VSM Software	Any	Yes	Yes

Technical Notes:

- Enhancements and improvements.
- New features are described in the updated User Manual.

After your VSM FW update is installed, your server must be rebooted.

Codedependency with Other Products and Software:

Product Name	Comments
VSM	VMS version 2.3.0418.200 is required before applying this update
All VIA Gateways	All VIA Gateways must run version 2.3.0418.960 as a minimum requirement for using the VSM FW upgrade feature
All VIA Gateways	Once upgraded to this version, VSM fully supports and manages the settings of VIA gateways running the latest FW version: 2.4.0918.996 . VIA devices running FW version 2.3 can still be managed by the upgraded VSM, but are not fully supported. VIA devices running FW version 2.2 and lower report their power status to VSM 2.4, but changes made through VSM are not applied.
All VIA Gateways	Use ONLY .zip files for updating your VIA devices.

RN Date: October 2018

Reference: 14624

The following changes were made in this version:

New Features:

	New Feature Description
	Added Campus PLUS Gateway as a supported device.
	Permission to manage Calendar Integration feature – User with permission to “Manage Gateways and Groups” inherits this permission. To manage, go to: User Management > User List > Edit Permissions.
	Sort Groups alphabetically – To sort, go to: Gateway Management > Group List > Group Name.
	Sort Gateways alphabetically, sort the FW version and the CPU usage by ascending/descending order – To sort, go to: Gateway Management > Gateway Status > Gateway Name.
	Gateway Management > Gateway List > Gateway Name: ability to Sort alphabetically the Gateways
	Any text entered in the “Remarks” field can be used by the filter to search for a specific Gateway – To add remarks, go to: Gateway Management > Add Gateway > Add Manually.
	“Date & Time” Settings 24-hours format in both Basic and Advanced Modes found at: Gateway Management > Manage Configurations.
	YouTube added as a feature for Mobile and Client devices – To configure, go to: Gateway Management > Manage Configurations.
	Tooltip for showing all details of the groups and gateways – To configure, go to: Gateway Management > Manage Configurations.
	Select default presentation encoding format as H.264 or JPEG – This setting overrides any client-side encoding settings. To select, go to: Gateway Management > Manage Configurations.
	Set a default volume level for VIA gateways – To set, go to: Gateway Management > Manage Configurations.
	Push pending configurations to a gateway – Use new “Pending for Updates” and “Updates completed” icons located at: Gateway Management > Gateway Status.

KRAMER ELECTRONICS, Ltd.

E-mail: info@kramerav.com

Web: www.kramerav.com

Release Notes History

	New Feature Description
	ON/OFF status of a display connected to a VIA device – To view the status: hover over the Power Status icon located at Gateway Management > Gateway Status. (Applicable to VIA GO, Connect PRO, and Connect PLUS gateways only).
	Set the Session Timeout duration and enable/disable the Captcha code – To configure, go to: Gateway Management > Global Settings > Session Settings.
	Add HOST files to all connected Gateways – To add, go to: Gateway Management > Global Settings > Host Configuration.
	Calendar Management category – Link your Office 365® or Google Calendar® account to your VIA gateways to display the room occupancy schedule on the VIA display.
	Digital Signage license message – If there is no Digital Signage license uploaded to VSM, a message appears.
	Add RSS feeds as a Media Type – To add, go to: Digital Signage > Manage Content.
	Emergency Messages – Create messages and immediately present them on the main display. To create, set duration and blinking option, go to: Alert Management > Instant Alert.
	Firmware Management – Available FW updates can be automatically obtained from updates.wowvision.com and become available for scheduling.
	Delete non-scheduled FW packages from the FW listing – To delete, go to: Firmware Management > Upload Firmware.
	Resume interrupted FW download – If there is a network interruption during the FW download to a VIA gateway, the download process resumes once the connection is reestablished.
	Updated Firmware alert – This new alert can be assigned to users who have permission to receive it.
	VIA client app for Windows/MAC laptops can be downloaded directly from the VSM rather than from one specific gateway connected to the network.
	Security Enhancement – Same user ID cannot be used simultaneously from multiple locations.

Release Notes History

Bugs to Fix in Future Versions:

QC ID	Deferred Bug Description
	Users having report access to one group, can view reports of groups for which they do not have report access permission. Same users can add gateways and manage configurations of these groups.
	When a gateway configured with the old gateway ID, then NTP and SSL certificates do not get synced to gateway. It keeps showing old status as synced, if already synced with older VIA unit. In future we will be adding a "Push Certificate" option to re-push it.

Known Limitations (including compatibility limitations):

QC ID	Limitation Description
	Digital Signage: When previewing scrolling text, using on Chrome browser, changing the scrolling speed does not affect the text, until it has scrolled past.

The following changes were made in this version:

New Features and Modifications:

	New Feature / Modification Description
	Import gateway feature has been removed from “Gateway List” page and moved to “Add Gateway” page. Add Gateway page now has a tab based user interface. The options are VIA Discovery Import Add Manually
	In Gateway Management > Add Gateway, the VIA gateways can now be added using VIA Discovery. No action is required on the VIA gateway side: The import feature enables you to add gateways in bulk by uploading a .csv file containing gateway details. Alternatively, each gateway can be added manually one by one. The MAC address of the gateway is now requested while adding gateways.
	In Gateway Management > Add Gateway, the groups can now be created while adding gateways (Gateway Management > Add Gateway > Group Name/Add Group).
	In Gateway Management > Add Gateway, if Airplay is enabled from VSM and no Airplay name has been specified, a default name is assigned to the connected gateways.
	In Gateway Management > Gateway List, the bottom buttons’ texts have been modified to “Reboot Gateway” / “Reset Gateway Session”.
	In Gateway Management > Gateway List, using the “Export to CSV” button to create an Excel table of gateways now shows a new “gateway version” column.
	In Gateway Management > Manage Configurations, the new Connect PLUS device has been added to the gateway models list.

KRAMER ELECTRONICS, Ltd.

E-mail: info@kramerav.com

Web: www.kramerav.com

Release Notes History

	New Feature / Modification Description
	In Gateway Management > Manage Configurations, the Customize Gateway Screen now has an option to add a DNS name for the second Room Name (in case dual network is enabled).
	Push configuration now sends configurations immediately, without rebooting the VIA device twice .
	Under Gateway Status, if a gateway has no participants logged in, when hovering over the participant icon with the mouse, a gray icon is displayed. If participants are logged in to that gateway, the icon turns red and a tool-tip appears, listing the exact number of connected users.
	NTP servers can now be added to VSM (Global Settings > NTP) for connected gateways to sync the time.
	The VIA admin 'su' password can now be set for all gateways from the Global Settings > Password Management tab.
	The 'Moderator Basic Mode' password for Connect PRO, Campus and Collage units can now be set from the Global Settings > Password Management tab.
	Custom HTTPS authentication certificates can now be uploaded from Global Settings > Upload Certificate.
	Session timeout can be set under VSM Management > Settings through a drop-down menu with preset values.
	VIA Units can now be registered to Kramer Portal in bulk through VSM under "Register VIA Units" menu. VSM saves your username and password for automatic registration of your VIA devices to your fleet.
	Captcha security tool can be enabled/disabled (for VSM only, not for VIA gateways) from VSM Management > Settings menu.
	Firmware is now automatically downloaded (from our server) and listed under Firmware Management > Upload Firmware, ready for scheduling/pushing to VIA gateways.
	Dependency on Authentication files, for uploading firmware packages, has been removed.
	In Digital Signage menu, all pages now inform if a license has expired or hasn't been yet activated.
	In Digital Signage menu > Manage Content, a "Refresh" button and a "Filter" button have been added on 'Playlist Media Download Status'. Statuses like "Pending", "In progress", and "Complete" have been added as filters.
	In the Digital Signage menu, "License Management" has been changed to "DSS Management".
	In Digital Signage menu > Manage Content, custom fonts can now be uploaded.
	In Digital Signage, campaigns can be scheduled to 1 year length maximum.
	In Digital Signage, a media file cannot be deleted if it is associated to a scheduled playlist.

Release Notes History

Bugs Fixed:

QC ID	Fixed Bug Description
179133	Top 10 users' report will not show more than 10 users.
180978	Group Hierarchy issue fixed.
	Issues when a Digital Signage Campaign was scheduled for a mix of VIA gateways models are now fixed.

Bugs to Fix in Future Versions:

QC ID	Deferred Bug Description
	None listed.

Known Limitations (including compatibility limitations):

QC ID	Limitation Description
	None listed.
