### Bugs to Fix in Future Versions:

QC ID	Deferred Bug Description
	None listed.

### Known Limitations (including compatibility limitations):

QC ID	Limitation Description
14703	3840x2160@60Hz resolution extension is supported only for 594MHz (native) and 516MHz (reduced) timings, not 533MHz (reduced) timing. 533MHz Workaround: Change source resolution to 3840x2160@30Hz.
	For specified extension distance performance, use Kramer DGKat cables with no mid-span cable connections.
	Use only shielded cable with both ends of the shield soldered to ground to eliminate ESD interface and with no mid-span cable connections.
