Product Name:	Multiple Products - Expanded Ethernet
Current Version:	F – 2.0. 24910
Version Date:	February 2016
Reference:	9961

Release Type:

☒ Firmware   ☐ Software   ☐ Hardware   ☐ New Product

Kramer Product Affected:

Product Name	Minimum FW Version for Upgrade	Recommended for All Units	Only if Added Features are Required
Multiple Products, see codependency	Any	Yes	N/A

Technical Notes:

- Support for the EDID read command was added.

Codependency with Other Products and Software:

- COM11 (FC-11ETH) Ethernet communication module is used in different Kramer devices.

Product Name: Multiple Products - Expanded Ethernet

Current Version: F – 2.0. 24910

Version Date: February 2016

Reference: 9961

The following changes were made in this version:

Added Features:

- Support for the EDID read command was added.

Known Issues:

- Version 2 of the COM11 (FC-11ETH) Ethernet communication module supports control from up to three Ethernet points (PCs or remote controllers). The reply from the controlled device is sent only to the last connected Ethernet point (PCs or remote controller).

Preceding Version: F – 2.0.21194

Product Name: Multiple Products - Expanded Ethernet

Preceding Version: F – 2.0.21194

Version Date: July 2015

Reference: 9137

The following changes were made in this version:

Fixes:

- A factory programing problem was fixed.

Known Issues:

- Version 2 of the COM11 (FC-11ETH) Ethernet communication module supports control from up to three Ethernet points (PCs or remote controllers). The reply from the controlled device is sent only to the last connected Ethernet point (PCs or remote controller).

Preceding Version: F – 2.0.18238

Product Name: Multiple Products - Expanded Ethernet

Preceding Version: F – 2.0.18238

Version Date: July 2015

Reference: 8867

Technical Notes:

- The firmware is applicable for version 2 of the COM11 (FC-11ETH) Ethernet communication module installed in different Kramer devices. To verify the version of the module in your device use K-LAN Configurator software (http://www.kramerelectronics.com/support/download.asp?f=47864).

- To upgrade the firmware to version 2 of the COM11 (FC-11ETH) Ethernet communication module use K-Upload software (http://www.kramerelectronics.com/support/download.asp?f=48886). Before connecting to the device set K-Upload to UDP and default port 50000.

The following changes were made in this version:

Added Features:

- Support was added for more than two simultaneous Ethernet connections.

Known Issues:

- Version 2 of the COM11 (FC-11ETH) Ethernet communication module supports control from up to three Ethernet points (PCs or remote controllers). The reply from the controlled device is sent only to the last connected Ethernet point (PCs or remote controller).

Preceding Version: N/A
