Product Name: VP-425
Current Version: F – 3.3
Version Date: March 2013
Reference: 3618

The following changes were made in this version:

Fixes:

- When the output resolution is set to NATIVE and the unit is reset to 720p/XGA, the OSD still shows NATIVE while the actual output is 720p/XGA. If the HDMI output is disconnected and then reconnected, the actual output resolution goes back to NATIVE
- After resetting the unit to 720p/XGA and then setting the unit to NATIVE in the OSD without saving the setting, after the timeout, the device goes back to output 720p/XGA but the output in the information menus is shown as NATIVE

Modifications:

- The second EDID block was removed to match the analog nature of the VGA input

Known Issues:

- There are no known issues

Preceding Version: N/A
